

# In Gratitude

2020 ANNUAL REPORT

Decatur County  
Memorial Hospital  
The Quality Care You Want. Close By

## WHO WE ARE

### OUR HISTORY

The dream of a local Hospital became reality when Decatur County Memorial Hospital opened its doors in 1922 at its current location. The much-anticipated, county-owned facility was built as a memorial to those Decatur County residents who fought and died for our country in World War I. The original hospital building, which is still in use, featured 16,000 square feet.

As the community and healthcare services continue to grow, multiple additions to both building and services have taken place. DCMH never forgets, however, their true mission to the community and why they opened their doors in 1922.

Although located in a small town, the care and spirit the hospital brings equals that of a major-city hospital. The hospital pushes the boundaries of health care, and hopes to grow today and tomorrow to better serve this community.

### OUR MISSION

Decatur County Memorial Hospital advances the health and wellness of our community by providing high-value patient-centered care, leadership and education.

### OUR VISION

To be the gateway to health and wellness in our communities by delivering quality healthcare and wellness leadership through best practices and innovative partnerships.

### CORE VALUES

#### *Integrity*

We promote openness in communication and accountability for our conduct and decisions. We demonstrate respect and honesty and promote an atmosphere of trust.

#### *Compassion*

We exemplify care and empathy towards our patients and their families as well as our team members. We respond thoughtfully and reasonably in all circumstances and celebrate our successes.

#### *Quality*

We focus on continuous performance improvement in all we do while serving each person as an individual, promoting innovation and pursuing extraordinary results. We are driven by being the best at what matters most: patients and their families, team members and our community.

#### *Community*

We contribute positively through community involvement and stewardship of resources striving to meet the health and wellness needs of our staff, community and the patients we serve.

## FROM OUR CEO...

2020 has been an unforgettable and difficult year for our community, particularly DCMH team members. The challenges have been many and yet, we are filled with gratitude and hope.

We knew we were fortunate to have a dedicated and talented staff long before 2020, but the past year has resoundingly underscored those sentiments. We are equally blessed to live in a supportive and generous community. The outreach and trust the community has expressed to DCMH through the pandemic encouraged and inspired us. And for these things, we are thankful.

*We are thankful for our front-line workers, from doctors and nurses to respiratory therapists and rehabilitation professionals to maintenance and food services who worked tirelessly throughout the year. The team received recognition and many awards for their community impact...*

*We are thankful for our community who provided messages of encouragement that nourished our souls and meals that nourished our bodies...*

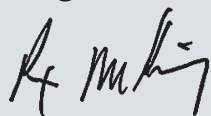

*We are thankful for the scientists and research professionals who made astonishing breakthroughs in unprecedented circumstances...*

*And thankful to be a part of a community like Decatur County that, when presented with the unimaginable adversity of a global pandemic, rose together to meet the challenge.*

This annual report for 2020 reflects on how we conquered these challenges together. We secured a large federal grant to support state-of-the-art technology upgrades for both our healthcare system and the community. Our team also participated in advanced trials for COVID-19 treatment, including monoclonal infusions and convalescent plasma, allowing us to provide compassionate care with the most effective, state-of-the-art service. In addition, we focused on investing by acquiring advanced diagnostic equipment and looking to the future by expanding our campus footprint.

As we all look forward to a brighter 2021, we know there is much work to do. We believe Decatur County Memorial Hospital is well positioned for the challenges beyond this year with continued improvements in access to care, underscoring our core values: community, quality, integrity and compassion.

With gratitude and hope,

Rex McKinney, FACHE  
President/CEO

## SPOTLIGHT: NICOLE

### Third Time's Definitely a Charm

By the time a woman delivers her third child, there aren't many surprises left.

However, when Nicole Stone delivered her third baby in 2020, there were pleasant surprises all along her pregnancy journey, including in the delivery room.

When Stone became the vice principal at South Decatur Elementary, it made sense to find an obstetrician closer to her work for ease of appointments. She chose Anxhela Treska, MD, an OB/GYN at DCMH Women's Care since 2014. And for that reason, Stone's third child was her first delivered at Decatur County Memorial Hospital (DCMH).

"From the very first appointment, I was made to feel very comfortable and could ask any questions I had," says Stone. "I went through a couple of miscarriages, and the staff was super supportive and committed to helping me carry a baby to full term."

When it came time for delivery – in Stone's case a Caesarian section – she says the experience was top notch. "Every nurse was wonderful and made us feel very well cared for and also respectful of our privacy. Everyone in the delivery room was happy and excited for us. Even though surgery isn't really the way you want to go, it was flawless."

The one not-so-pleasant surprise, of course, was being pregnant during a pandemic. "I can't imagine if it was my first one. But I knew what to expect in general. By the time I delivered, my husband Paul was able to be with me during delivery and come in and out of the hospital as needed." The only disappointing part for Stone was the fact that her two older boys couldn't meet their big brother at the hospital.

"Honestly, I wouldn't change a thing," she says. "This is our last baby, and it was a great experience."

For more information  
about the Women's  
Center, visit  
[www.dcmh.net](http://www.dcmh.net). or  
call 812-663-1240.

## LOOKING BACK

### **DR. KRISTIN KINDRED, DPM, AACFAS**

DCMH welcomed foot and ankle surgeon Dr. Kristin Kindred to its medical staff in July 2020. Dr. Kindred offers the most comprehensive care of the foot and ankle. Using evidence-based care, she treats adult and pediatric patients with fractures, Achilles tendon pathology, bunions, plantar fasciitis, sports injuries, flatfoot, arthritis including total ankle replacement, acquired foot and ankle deformities and numerous other foot and ankle conditions.

### **SETH CAHN, MD**

Neurologist Dr. Seth Cahn joined the DCMH team in 2020. He is a fellowship-trained general neurologist specializing in the treatment of epilepsy related disorders. As a general neurologist, he also routinely sees patients with headache and migraine, back and extremity pain, motor and sensory syndromes, dementia, movement disorders, multiple sclerosis, stroke and neurovascular syndromes.

### **DEEPAK JASUJA, MD**

Joining the DCMH staff in 2020 as a nephrologist, Dr. Deepak Jasuja's specializes in treating acute kidney injury, acid base and electrolytes, renal replacement therapies, immune glomerulonephritis and vasculitis, sepsis, airway, resuscitation science and extracorporeal membrane support.

### **DESIRAE MOORE, LCSW**

Desirae Moore is a Social Worker with experience in working with children, adolescents, adults, and families. She believes in and practices from a strength-based and solution-focused approach. Her clinical experience includes working through crisis, anxiety, depression, grief/loss, serious mental illnesses, and relationship conflicts. By using a combination of evidence-based approaches, such as cognitive-behavioral therapy, she helps individuals move through life's challenges.

### **DCMH CARE ENHANCED WITH TEAMHEALTH**

A partnership between DCMH and TeamHealth launched in April 2020 to offer programs and initiatives to ensure continued access to high quality emergency services. TeamHealth will collaborate with DCMH clinical teams to maximize operational efficiency and continue the journey to consistently provide patients with compassionate care of the highest quality.

Recruiting for physicians and care providers is a significant challenge in rural healthcare. TeamHealth addresses that challenge by providing partners and other resources to improve care and boost patient satisfaction.

## NEW ORTHOPEDIC EQUIPMENT

DCMH improved patient outcomes in 2020 with the addition of three new pieces of surgical equipment for use in orthopedic procedures. The three pieces are designed to increase the types of procedures that can be performed, increase the number of positive outcomes, and increase accuracy during surgery.

The SPIDER2 Limb Positioner helps position the patient's arm to allow better access to the shoulder joint during shoulder replacement surgeries, offering exceptional control to the surgeon. The system maintains steady position during the entire procedure and eliminates the need for manual adjustments.

The Hana Table, provides a patented femoral lift and support system within a top quality table created for orthopedic procedures,

enhancing the treatment of hip fractures, complete anterior total hip replacements and hip arthroscopy. It enables safe hyperextension, adduction and external rotation of the leg. These movements allow surgeons the opportunity to perform an anterior approach to total hip arthroplasty, the procedure of choice for many surgeons.

The third piece, a product of OrthoAlign called KneeAlign, a flexible navigation unit used in total knee surgery, increases accuracy in limb alignment while decreasing blood loss. It improves overall limb alignment, which leads to patients experiencing less pain and greater mobility after surgery. The small and lightweight unit delivers consistently positive results.

## VIRTUAL CARE (TELEHEALTH) RISES TO THE OCCASION

When we began offering Virtual Care visits in 2019, we had no idea that in 2020 that would become a preferred way in which to communicate with a healthcare professional. Needless to say, the convenience of dialing in and chatting with a healthcare provider has been well received.

A wide variety of health concerns can be treated virtually from preventive care to more chronic symptoms. The most common of which are colds, strep throat, UTI's, allergies, and ear infections.

During a Virtual Care visit, a provider discusses concerns, develops a treatment plan and sends any necessary prescriptions to the pharmacy of choice. Virtual Care visits are covered by most insurances.

## ONLINE APPOINTMENT REQUESTS

Enhancing easy access to care, DCMH established access to online appointment requests from the website in 2020. With a quick four-question form, the DCMH Patient Call Center reaches out to the patient and schedules the next appointment. This service is available for in-person appointments as well as Virtual Care appointments with all DCMH primary care providers.

## LOOKING AHEAD

### DEANN BREWER, MD

DeAnn Brewer, M.D. practices internal medicine. She is expertly trained to diagnose and treat a wide range of disease and conditions such as diabetes, heart disease, hypertension and thyroid disease. Dr. Brewer has special interest in prevention and integrative wellness, as well as treating obesity and hormone replacement therapy in appropriate candidates.

### KAREN SUMME, MD

Karen Summe, M.D. is a general surgeon, specializing in abdominal surgeries including the esophagus, stomach, liver, gallbladder, hernias and colon. Providing minimally invasive approaches to surgery provides her patients with less pain, less scarring and a faster recovery. As a general surgeon, she seeks to provide patients with concrete solutions to their ailments.

### EYE SURGERY RETURNS TO DCMH

DCMH will begin providing eye surgeries in 2021, including cataract procedures, by two of southeastern Indiana's leading ophthalmologists.

Physicians, Kevin Scripture, M.D. and Eric Scripture, M.D. will offer these surgeries at DCMH and work out of their new Whitewater Eye Center office located at 955 N. Michigan Avenue, Suite 2, in Greensburg. Whitewater Eye Center Greensburg will also include Dr. Chris Hainline and Dr. Brianna Niehoff (Keener).

In their new Greensburg office, they will provide specialty eye care, including medical retina care for macular degeneration patients needing eye injections, glaucoma care, diabetic eye exams, and other medical eye care.

### VIRTUAL CARE FROM SCHOOL OR THE WORKPLACE

In 2021, DCMH plans to launch a partnership with TytoCare, a global telehealth company that connects people to clinicians to provide virtual examination and diagnosis solutions to students, school staff and employees... without leaving school or the workplace. Virtual care uses video technology to connect a school or workplace nurse with a DCMH provider, who uses video technology to examine the heart, lungs, throat, ears, abdomen, skin and temperature.

For more information about Virtual Care, call 812-222-3264 or email [Virtual.Care@dcmh.net](mailto:Virtual.Care@dcmh.net)

## FIGHTING A PANDEMIC

### DCMH on the Front Lines Fighting COVID

The front-line medical personnel of Decatur County Memorial Hospital have been leading the charge to health for decades. But this year, our healthcare professionals were transformed into heroes battling a viral foe named “COVID-19.”

#### **CASEY YEAGER, EMERGENCY ROOM NURSE**

Born at Decatur County Memorial Hospital, Casey Yeager always wanted to be a nurse. She worked at the hospital as a tech throughout her college career and when she graduated nursing school, she was welcomed with open arms. That was less than a year before DCMH would be hard hit by COVID-19. “I never in my life thought about dealing with a global pandemic.”

Working in the ER with constant exposure to the invasive virus, she did contract COVID. “I’m young, I wasn’t seriously sick... but I lived in the camper in our driveway for a couple of weeks.” For her, the lingering side effects have been the emotional ones. “The emotional toll of watching people die... or the moment you intubate a patient, knowing the lasting effects of lying flat on your back on life support,” she recalls. “My mental health was super strained... it was so terrible, it’s honestly a little blurry.”

Lifting Casey up has been the outpouring of both community and family support as well as the support she received from her team. “It takes a lot of teamwork, and we all had to lean on each other,” she says. “I’d go home and just cry to my parents. They were amazing in their support, allowing me to process everything how I needed.

“The community shared sweet notes and gifts, elementary kids wrote us,” she continued. “I’d like to thank those individuals. Especially those who have social distanced, worn masks and are getting the vaccine... that means a lot to us.”

#### **SHELLY LANE, RN MEDICAL/SURGICAL UNIT**

Like Casey, Shelly has been a nurse for a relatively short time – only four years – and never expected to be dealing with a pandemic. “I was scared to death at first, just like everyone else. We didn’t know what to expect,” she remembers. “I wasn’t terrified for myself, but my family, loved ones and those who weren’t protected like we were.”

Even after a year, Shelly says the gravity of the illness weighs heavily on her mind. “I still don’t wear my work clothes into my house for fear of spreading this virus,” she says. “I shower every day here at work and bag my clothes to go home. We all want to say, ‘It’s behind us.’ But people are going to need to continue to wear masks and do all the right things.”

While it was tough to adjust protocols on the fly as more became known daily about the virus, what never got easier for Shelly was dealing with the patients who were sick and alone. “I spent hours just sitting with people so they wouldn’t be alone. It still brings me to tears.”

## FIGHTING A PANDEMIC

### VIRTUAL CARE RECEIVES A FINANCIAL BOOST

In July 2020, Decatur County Memorial Hospital received more than \$698,000 in grant funding for the COVID-19 Virtual Care program, setting the stage for increased technology and outreach capabilities during the pandemic and beyond.

The grant supported

- Remote patient monitoring equipment
- A patient telehealth platform
- Network upgrades
- Tablets, and mobile hotspots to provide a variety of telehealth options, including:
  - o Remote patient visits to reach a wide range of patients
  - o Rehabilitation assessments using telehealth for physical, occupational and speech therapies
  - o Behavioral health services for seniors in individual and group sessions, and
  - o Continuous remote monitoring of patients stable enough to be cared for in the home setting but showing symptoms of COVID-19 infection.

**\$3000** IN GIFT CARDS WERE  
DONATED TO STAFF

### PATIENT-CENTRIC TECHNOLOGY

A few short months after receiving the FCC grant in 2020, a significant upgrade to DCMH patient monitoring and telehealth systems improved both patient care and staff efficiencies.

In addition to monitoring vital signs of all in-patient rooms from a central monitoring station, the new system alerts clinicians via mobile of any changes which may need to be checked. The non-invasive technology is located at every bedside, eliminating the burden for nursing staff to spend time locating important equipment. This initiative also allows DCMH to maintain the safety of its patients during this critical time in health care.

In addition, a newly released patient safety platform -- Masimo SafetyNet™ -- allows the DCMH care management nurses to monitor the health status of patients remotely. Daily check-ins including monitoring vital statistics and symptoms allow care managers to recognize and treat issues prior to patients fully realizing the problem.

With Masimo SafetyNet, DCMH can send patients home with the security of their provider knowing critical vital signs such as oxygen saturation and respiration rate will be safely monitored at home. This technology also serves as a cost-effective way to scale monitoring and increase capacity for hospitals.

DCMH

### DCMH PROVIDES ANTIBODY TREATMENT TO AT-RISK POPULATION

Within five days of Indiana-based Eli Lilly receiving emergency approval for its monoclonal antibody treatment for COVID-19 from the Federal Drug Administration (FDA) in December 2020, DCMH was delivering the intravenous treatment to patients.

The logistics of that alone were a herculean feat, according to Wayne Perry, MD. “Within five business days of the FDA’s approval. We got the product, set up protocols, established a location that would eliminate exposure to others,” said Dr. Perry. “It was a tremendous effort on the part of our staff and leadership, working in conjunction with pharmacy, maintenance, supply services, the infusion center, and nurses.”

“Among the accomplishments in those five days was the establishment of a Satellite Infusion Center for the treatment,” said Nikki Reed, manager of Cancer Care and Infusion Services. While the antibody treatment is not for those admitted to the hospital or receiving oxygen support, those receiving it generally felt better within 24 hours and greatly reduced complications leading to hospitalizations.

### PARTNER TO MAYO CLINIC IN COVID-19 PLASMA TREATMENT

In June 2020, DCMH participated in the national convalescent plasma Expanded Access Program, testing the use of donated blood as a treatment for people with severe COVID-19. Mayo Clinic served as the lead institution for the program.

A now widely accepted treatment, the approach was cutting edge at the time as scientists recognized that patients with COVID-19 may improve faster if they receive plasma from those who recovered from COVID-19 because it may have the ability to fight the virus that causes COVID-19.

## SPOTLIGHT: WANDA

### Care “Above and Beyond” for Former Nurse, COVID-19 Patient

As a 38-year veteran nurse for Decatur County Memorial Hospital, Wanda Lecher considered many of the staff members long-time friends and an extension of her family. But when she was diagnosed with COVID-19 in March 2020, both old friends and new ones pitched in to ensure her recovery.

“They all cared for me like I was a member of their family. It was such a team approach, and you don’t get that hometown hospital care everywhere. It really was care above and beyond the norm.”

Wanda remembers very little about the family vacation they took to Florida in mid-March, the return flight home or the trip to the DCMH emergency room shortly thereafter. Nor does she remember 15 days on a ventilator after being diagnosed with COVID-19.

“I don’t remember much of my early journey,” shares Wanda. Thomas Ferry, M.D., board-certified DCMH pulmonologist made sure Wanda’s family were kept apprised of her condition and treatment. “Dr. Ferry communicated with my family, and they made the best decisions for my care together. They shared with me later that they knew that the care I was receiving was top-notch and that helped calm their fears.”

Once off the ventilator, Wanda began to experience kidney failure and developed a blood clot in her lung and in both legs. She was transferred to another facility to receive dialysis. However, once she improved and April ended, she happily returned to DCMH for further treatment.

The extended inactivity and time on a ventilator caused muscles and nerves to atrophy. The hospital’s pharmacy team along with respiratory, physical and occupational therapists became daily interventions. After 47 days in the hospital, Wanda was moving toward recovery.

“This dedicated team was doing what they do every day for every patient,” says Wanda. “This is the routine commitment to care they provide — it’s just their standard of care. There isn’t a place I could have gotten better care from day one.”

For more information on DCMH, visit [dcmh.net](http://dcmh.net) or call 812-663-4311.

## COMMUNITY EVENTS

### HEALTH FAIRS

DCMH provides several health fairs to community members and local companies and organizations. In 2020, we were unable to have our regular indoor event but offered a drive-thru Healthy Fair to the community. 321 individuals participated and received free blood screenings. DCMH also provides a similar Health and Business Expo in Westport. 190 Westport residents were able to receive free flu vaccines at this event.

### FREE FLU VACCINES

One of the community health initiatives that Decatur County Memorial Hospital provides to the public in order to improve the health of all residents of Decatur County is free flu vaccinations.

Through funding raised by the Hospital Foundation of Decatur County and other DCMH programs, we were able to provide 2394 free flu shots during 2020. This included all clinics and drive thru opportunities.

Did you know...  
In 2020 DCMH staff donated  
1,385 volunteer hours to our  
community?

### FREE MILK DAY

DCMH partnered with Prairie Farms and distributed 8600 gallons of free milk to the Decatur County community during the summer of 2020. In addition, 4300 gallons were dispersed at the IGA parking lot to residents in the Versailles area.

Many area volunteers including the Greensburg Fire Department, Versailles Fire Department, and Mayor Marsh helped to distribute the milk.

### TOTAL JOINT DAY

DCMH hosted its annual Total Joint Day in October. This event offered a free xray of the hip, knee or shoulder. Orthopedic Surgeons gave an educational seminar on both surgical and non-surgical treatments that can provide relieve to those participating. Participants were able to gather information from other DCMH service lines as well as enjoy light refreshments.

#### DATA FOR 2020 TOTAL JOINT DAY

Knee Xrays: 14 completed

HIP Xrays: 14 completed

Shoulder Xrays: 10 completed

## OUR ACHIEVEMENTS

### SILVER WORKPLACE HEALTH ACHIEVEMENT

The American Heart Association has defined best practices for employers to use to build a culture of health for their employees in the workplace.

The Association's Workplace Health Achievement Index measures the extent to which the company has implemented those workplace health best practices. Companies recognized at the Silver level have achieved an Index score of 130-174 out of a maximum 217 points.

### ACHIEVEWELL 5 STAR

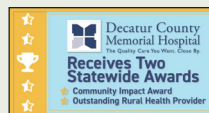

The Wellness Council of Indiana recognizes those organizations who value their employees health and well-being by demonstrating numerous wellness criteria. Some of which include community involvement, motivation-based programming and results initiatives, company culture, and evidence of senior leader involvement. The award represents five years of continuous wellness program activity at DCMH.

### INSPIRE: HOSPITAL OF DISTINCTION

INSpire was developed to encourage the implementation of best-practice care for Hoosier moms and babies and recognize hospitals for excellence in addressing key drivers of maternal and infant health.

Achievement of this award signifies a Category of Excellence based on five key areas of infant safe sleep, breastfeeding, tobacco prevention and cessation, perinatal substance use, and AIM Patient Safety Bundle: Obstetric Hemorrhage.

### COMMUNITY IMPACT AWARD

The Indiana State Office of Rural Health awarded DCMH the Community Impact Award for its response to the COVID-10 Pandemic. The award was given earned due to collaboration, agility, following best practices, and innovative partner-ships DCMH implemented to meet the needs of the community.

### OUTSTANDING RURAL HEALTH PROVIDER

Pharmacist Matt Weber earned this recognition due to the unique program he developed to provide Medicare Part-D education and information during open enrollment. Since its inception in 2018, Matt has saved Medicare participants \$84,000 collectively.

### COMMISSION ON CANCER ACCREDITATION

This accreditation is for professional organizations dedicated to improving survival and quality of life for cancer patients through standard-setting, prevention, research, education, and the monitoring of comprehensive quality care.

### ISO 9001 QUALITY MANAGEMENT CERTIFICATION

Certification of this quality management system demonstrates Decatur County Memorial's commitment to consistency, continual improvement and customer satisfaction.

The ISO 9001 standard provides specific requirements for a quality management system that will enhance DCMH's ability to consistently deliver products and services that meet customer - as well as statutory and regulatory requirements.
